

It's my time for MyAcuFacial...

Program of facial rejuvenation to include:

- Full Intake and constitutional Profiling
- Microcurrent Technology used to heal, tone, and tighten facial and body areas
- Full Herbal Consultation to increase your deepest levels of toning and rejuvenation

Call 512.909.1925 today for your more information!

What are Microcurrent Facials??

"A phenomenal non-surgical age-defying treatment that firms, tightens and rejuvenates."

Why not offer yourself a more youthful appearance, escape the stress of everyday life and feel and look more rejuvenated.

Now, is the time to try our increasingly popular microcurrent therapy for a "lunch-time face-lift" procedure. This non-surgical Facial Sculpting doesn't require going under the knife. It is a simple 30 to 60 minute, painless, safe, and healthy way to create a more youthful appearance. There is no recovery time, no medications, and no worry that something might go wrong.

The Microcurrent therapy is used for the non-invasive treatment of wrinkles and works to lift sagging skin by tightening muscle tissue with an advanced form of the machine's secret wave pattern.

Microcurrent Technology is a technique that uses a combination of sequenced waveforms, which are conducted through probes onto facial muscles utilizing traditional acupuncture points and micro-current electrical energy to stimulate and exercise all facial tissues. This treatment allows the facial tissues to strengthen. During the treatment blood circulation is increased and pores become tightened giving the skin a more refined and youthful appearance.

Microcurrent Technology procedures promotes unprecedented healing blood flow in muscle tissues. This healing action creates an exercise effect on aging, weak, inactive facial muscles, thereby strengthening and toning them and creating a more youthful appearance. The procedure activates a healthier, "muscle memory" that begins to accumulate maintained elasticity and tone within 6 – 10 procedures. Most clients will see and feel the results on their first visit! Once optimum results are attained, clients can maintain those amazing results with continued monthly treatments. Surgical face-lifts eliminate sagging skin, but the condition of the skin does of change.|

The benefits of Microcurrent Technology include:

- **Reduction of fine lines, creases, and wrinkles**
 - ✓ Hydration and revitalization, resulting in smoother and softer skin
- **Improvement of blood circulation and lymphatic drainage**
- **Rejuvenating restoration of the "pink glow" of youthful tones**
- **Visible firming and contouring, lifting overall drooping features**
- **Tightening of sagging jowls, doubling chins, and fatty cheeks**
- **Shrinking of enlarged pores**
- **Reduction of blackheads and acne**
- **Reduction of scars and pitting**
- **Reduction of dark circles and puffiness under eyes**
- **Reduction of the symptoms from Eczema, Melanoma, and Rosacea.**

All of this without the usual risks...
No redness or swelling, no harmful side-effects, No wounding
No abrasion, No soreness, and No pain!

Imagine a technology for body aesthetics that achieves the following...

Spot treatment in specific body areas

Tightening of loose or wrinkled skin

Cellulite reduction

Body shaping and muscle toning

Boosts metabolism and energy levels

Reduces scars, acne, and stretch marks

Contributes to improved muscle strength

Treatment of post-pregnancy body issues

Reduction in calloused elbows and knees

Measurable overall reductions

The Beautiful Image Facial and Body Sculpting™ machine was designed for...Men and Women providing amazing results!
